

01__PROJECT__PROMPT.md

MedTrack AI

This is the master project prompt.

Objective

Build a production-ready medicine purchase tracking platform using Antigravity, React, TypeScript and Supabase.

Core Modules

- Authentication
- Orders
- Inventory
- Analytics
- OCR
- AI
- Notifications
- Reports

Development Rule

Implement milestone-by-milestone only. Never skip validation.

02__PRODUCT__REQUIREMENTS.md

Product Requirements

Vision

A unified platform to track medicine purchases across pharmacies.

User Stories

- As a user, I can record orders.
- As a user, I can upload invoices.
- As a user, I can view spending analytics.
- As a user, I can track inventory and expiry.
- As a user, I can compare historical prices.

Acceptance Criteria

Every feature must include validation, loading, error and success states.

03__INSTRUCTIONS.md

Instructions

- Follow feature-based architecture.
- Use TypeScript.
- Use Supabase Auth, Storage, RLS.
- Never continue to the next milestone until approved.
- No lint or TypeScript errors.
- Use reusable components.

04__DATABASE.md

Database

Core tables: profiles families family__members platforms medicines orders order__items inventory price__history notifications attachments prescriptions settings

All tables use UUID primary keys, timestamps, soft delete and RLS.

05__API__SPEC.md

API Specification

Supabase client is the primary API.

Edge Functions: - OCR - Scheduled reminders - AI insights - Gmail sync (future)

06__UI__UX__GUIDE.md

UI/UX Guide

Material Design 3 Light/Dark mode Bottom navigation Responsive layouts Accessible components

07__MILESTONES.md

Milestones

1. Foundation
2. Auth
3. Database

4. Profile
5. Medicines
6. Orders
7. Inventory
8. Analytics
9. Reports
10. Notifications
11. OCR
12. AI
13. Optimization
14. Security
15. Play Store Release

08__TESTING.md

Testing

Manual checklist: - Auth - CRUD - Reports - Notifications - Inventory calculations - Security

09__DEPLOYMENT.md

Deployment

- Configure Supabase
- Android signing
- Generate AAB
- Publish to Play Store
- Privacy policy

10__AI__MODULE.md

AI Module

Future capabilities: - OCR extraction - Price prediction - Spending insights - Cheapest pharmacy recommendation - Conversational assistant

README.md

MedTrack AI Documentation

This repository contains the planning documentation for MedTrack AI.
